GSP9700JLR Features

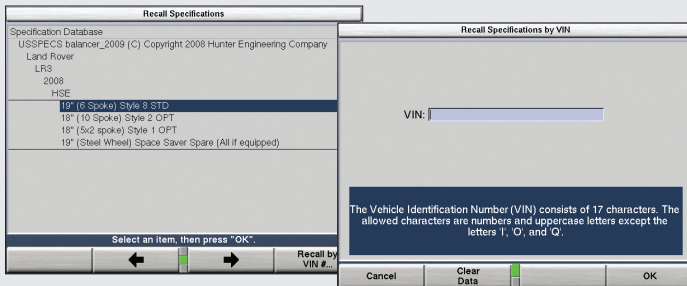

The GSP97JLR is a highly customized Road Force Measurement® System that offers Jaguar and Land Rover service information at the balancer including:

- ✓ Jaguar and Land Rover specifications
- ✓ Technical service bulletins
- ✓ Proper Wheel Mounting Methods

All specifications, TSBs and additional data are stored on an easy-to-use flash thumb drive that plugs directly into a USB port mounted near the LCD screen. Periodic updates are available online through a secure website. To update information, simply download the files onto the thumb drive from any shop computer and plug it into the balancer.

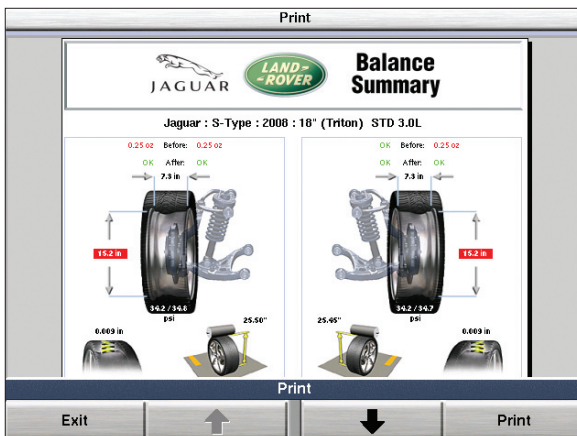

Fast and Easy Vehicle Data Entry

Gaining access to vehicle- and wheel-specific data is as easy as searching for the make and model or entering the VIN on the recall specifications screens...

...And an even faster way is by using the optional barcode scanner to automatically enter the VIN with a quick scan.

Detailed printouts show before and after results of each wheel.

Each GSP97JLR model includes JLR-specific adaptors to ensure correct mounting and precise balancing results.

Available Models:

GSP972207JLR— Includes JLR-specific software, flash thumb drive, wheel lift, printer and JLR wheel-mounting adaptors

GSP972201JLR— Includes JLR-specific software, flash thumb drive and JLR wheel-mounting adaptors

* Additional wheel-mounting accessories are sold separately.
