HawkEye™ Sensor Configurations

The fixed-column standard configuration HS401FCJLR fits most service bay applications.*

HS401LCJLR provides a vertical camera lift to achieve additional lift height or to work with the vehicle lowered to the floor.*

The HS401WM can be mounted to the wall or ceiling. When the ceiling-mount is paired with the RX-P Pit In-Ground Scissor Lift, the combination is ideal for drive-through service bays handling vehicles with minimum ground clearance.*

Sensors shown with optional console and lift.
